

Confused by music theory???

Tired of learning songs with NO IDEA what you're actually doing?

Looking for a shortcut to memorizing songs?

Want to build a foundation to start playing songs by ear?

Would you like to get the music you hear out of your head and into your hands?

This 12-Week Music Theory For Guitarists is designed to give you a better understanding of how the pieces fit together. The internet can be great for learning a lot of things... but YouTube and search engines can only answer the questions you think to ask... and most aspiring guitar players ask the wrong questions!

At Quarter Bend Guitar Studio, we know how daunting music theory can appear. Especially when the best music theory content out there teaches theory on the staff (which you probably can't read) or the piano (which you probably can't play). It's no wonder most learners give up... there are too many pre-requisite skills that frankly aren't very exciting.

What we're going to do is give a limited number of students an opportunity to learn how theory applies to the guitar AND use their guitar to help develop their ear.

In this 12 week Music Theory For Guitarists Course, you will learn:

- The secret to learning all major 15 keys
- The chords you can build in those keys
- How to find the 15 minor keys
- How to create your own chords
- How to build chord progressions
- How to hear common melodies AND chord movement so you can start playing by ear
- How to translate what you are hearing to the guitar

All you need is the desire to learn and *very basic guitar skills* and you are ready for this course!
